SUMMARY

Computer Science graduate (2026) and full stack engineer at a startup, building features from the database to the screen with React, TypeScript and Supabase. Completed a 400+ hour internship at the Davao City Water District, building tools that staff use every day. Managed a machine learning thesis project trained on data labelled for Filipino households. Looking for a full stack role with room to grow.

SKILLS

Languages: TypeScript, JavaScript, Python

Frontend: React, Tailwind CSS, Ant Design, TanStack Query, Zustand, MobX, Vanilla Extract CSS

Backend and data: Supabase (PostgreSQL), REST APIs, Axios

Also: Figma, testing and bug fixing, working with remote teams. Learning Flutter and Dart.

EXPERIENCE

Full Stack Engineer, EMIGMA June 2026 – Present

Early-stage startup · React, TypeScript, Supabase (PostgreSQL), Tailwind CSS

- Joined before launch as a founding engineer and built core features of a role-based web platform that serves several user groups.
- **Onboarding:** built user sign-up with identity verification.
- **Document management:** built secure document upload with multi-step approval workflows.
- **Dashboards:** built live dashboards that show each user's progress and status.
- **Marketplace and booking:** designed and built listings, reservations and eligibility checks.
- **Case management:** built a Kanban-style board for tracking cases, with KPI reports.
- Work directly with the founders through QA cycles: triage bug reports and ship fixes and features every cycle.
- Product details are kept general under a non-disclosure agreement.

Frontend Developer Intern, Davao City Water District January – March 2026

Leak and operations management system · React, TypeScript, TanStack Query, MobX, REST APIs, GIS

- Completed 400+ hours over 10 weeks on an internal system that field crews and office staff use every day.
- Built a major operations module from start to finish, and moved the app's data handling from MobX to TanStack Query, which fixed screens that showed outdated data.
- Built admin tools for user accounts and access control, plus report forms with image support and printable pages.

Independent Contractor, Content and Site Systems (Remote) 2026 – Present

- Manage SEO and website content for several client sites at the same time, planning and delivering the work independently.
- Built and ran a set of 36 linked landing pages, with repeatable steps for writing and checking content.

PROJECTS

HEROCS: Household Hazard Detection App (Thesis) Project Manager

Flutter, TensorFlow Lite, ARCore, YOLOv8 · github.com/riggsybanez/HEROCS-Project

- Managed the thesis team that built an Android app which finds household hazards through the phone camera and tells caregivers what to fix.
- The YOLOv8 model was trained on 5,373 images across 24 hazard classes, labelled for Filipino households, then exported to TensorFlow Lite to run on the phone.
- The app scores each room with one danger index and lists safety advice, most severe first.
- Everything runs on the device and works offline, for homes where mobile data is costly or unreliable.

UIC-CCS Alumni Portal QA and Team Member

React, Supabase · ccs-alumni-portal-system.vercel.app

- Tested features as the team's QA and reported bugs to the developers. The platform covers alumni registration with admin approval, a job board, graduate surveys (tracer studies) and admin dashboards.

EDUCATION

B.S. Computer Science, University of the Immaculate Conception 2022 – 2026

Davao City, Philippines · Graduated April 12, 2026

CERTIFICATIONS (COURSERA, 2026)

Frontend Development using React · Data Analysis using Microsoft Excel · Business Analysis and Process Management · English for Effective Business Speaking
